ISF Iceland multi-species demersal fishery

Fishery Certificate Statement

The Public Certification Report and other documents pertaining to the assessment of the ISF Iceland multi-species demersal fishery are available on MSC's website:

<https://fisheries.msc.org/en/fisheries/isf-iceland-multi-species-demersal-fishery/@assessments>.

Eligibility to access the certificate

Fish from eligible fishing vessels, whole and/or semi-processed, landed at any officially approved landing site (harbour) and/or sold via fish auction and/or kept in cold store facilities in Iceland or in a Third Country, may therefore enter into further certified chain of custody and be eligible to carry the MSC eco-label, provided these are sold through a member of the client group, i.e. shareholder of the Iceland Sustainable Fisheries ehf. and/or its registered certificate sharing entities.

Operators who do not share the certificate but who take ownership of the fish before it is sold to certificate sharers are required to hold MSC Chain of Custody certification. Subcontractors, who do not take ownership of the catch but are involved in the handling of the fish after landing, are required either to be holders of MSC Chain of Custody certification or to be listed as subcontractors on the scope of another MSC Chain of Custody certificate holder.

Buyers that are not members of the client group will need to verify that (a) the supplier is CoC certified with the UoA species in scope, (b) the species was derived from one of the Units of Certification (see Table 3-1) and that (c) the product has at some point passed through a member of the ISF client group. If condition (c) is not met, buyers may wish to notify next link of buyers in the chain that the product cannot be marketed to the final consumer with the ecolabel unless and until such condition has been met.

The Client, Iceland Sustainable Fisheries Ltd., has issued a statement outlining the general terms of a potential extension of the client group for wider sharing of a potential certificate (published in its entirety in section 3.1.1 of the PCR). A list of current members of the client group is provided in the appendix below. The latest update can be obtained directly on the ISF website (see <https://www.isf.is/isf-aethildarfyrirtaeligki.html>) or from Vottunarstofan Tún upon request. Members of the client group who first take ownership of fish after landing, as well as any member and non-member engaged in post-landing processing of the fish, will need to hold MSC CoC certification.

Vessels eligible to land and supply fish from the ISF Iceland multi-species demersal fishery to client members

Certification will include fish caught by all registered Icelandic vessels, as well as Norwegian, Faroese and Greenlandic vessels, provided those are carrying valid permits to operate within the Icelandic EEZ. It will also include fish handled by all officially licenced fish auctions; auctions must however acquire chain of custody certification in the event they take ownership of the catch and/or are

involved in the processing of the catch either as owners of the fish or sub-contractors. A list of vessels with valid licences for fishing within the Icelandic EEZ is available from the Fisheries Directorate upon request (<http://www.fiskistofa.is>).

A list of Icelandic vessels and their quotas can be found on the website of the Directorate of Fisheries, see <http://www.fiskistofa.is/aflamarkheimildir/uthlutadaflamark/fyrriar/> (*Úthlutun til skipa 2016/2017 and 2017/2018*).

Appendix to Fishery Certificate Statement:

Operators currently (10.9.2019) sharing MSC certificate issued by Vottunarstofan Tún ehf. for the ISF Iceland multi-species demersal fishery

<i>Company Name - Iceland</i>	<i>Icelandic Reg. No.</i>	<i>Date of entry</i>
