

Norway NEA cod and haddock fishery
Marine Stewardship Council Certification

Certification Body: DNV GL Business Assurance

Notification of change in Surveillance schedule

DNV GL - Business Assurance (DNV GL) notifies that the surveillance schedule in the third surveillance report of 16th January 2017 has been changed within the requirements of FCP v2.1 clause 7.28.8.1 allowing the coordination of site visits with the surveillance audits of other nearby MSC fisheries, thereby minimising the inputs required from management agencies and stakeholders. The flexibility in audit schedule permitted by this clause means that some or all surveillance audits will not be held on the anniversary date of the certificate.

The fourth surveillance audit is integrated with assessments of other fisheries for the client NORGES FISKARLAG, each with varying anniversaries. This is the most viable period for all the relevant fisheries and the client.

The fourth surveillance audit for this fishery is now scheduled for week 43 (21st to 25th October 2019) and announcements will be posted accordingly.

Information regarding this fishery can be accessed at:
