Issued by Acoura Marine trading as Lloyd's Register. This certificate is the property of Acoura Marine trading as Lloyd's Register and must be returned immediately on request. To check its validity telephone 0131 335 6662, or write to Lloyd's Register, 6 Redheughs Rigg, South Gyle, Edinburgh H12 9DQ.

Visit the MSC Track-a-Fishery pages <https://fisheries.msc.org/en/fisheries/> to validate certificate authenticity.

Units of Certification (UoC)

UoC 3

Species:	Greenland halibut (<i>Reinhardtius hippoglossoides</i>)
Geographical area:	NAFO Division 0B, Canada
Method of capture:	Bottom trawl
Stock:	Northwest Atlantic Greenland halibut
Management System:	NAFO, DFO
Client Group:	AGC, NFA, NCC, ASP & Unattributed Fishery Client Companies (Eco Sound Fisheries Corp; Fishermen's Market International Inc.; Ueushuk Fisheries)

Note that other eligible fishers may also be included in some Units of Assessment but not initially certified (until covered by a certificate sharing arrangement).

Other Eligible Fishers:	<p>In addition to the harvesting companies who are members of one of the four associations within the client group, there are five companies with fixed gear allocations of Greenland halibut but no fishing capability of their own. They utilize their allocations by entering into sharing arrangements with members of the client group. Three of these companies have joined the client group without being members of any of the four associations.</p> <p>If, at any point in the future, the two remaining companies had catching potential they would be considered to be "other eligible fishers" and, as such could be eligible to join the client group under agreed certificate sharing arrangements.</p> <p>If/when the fishery is certified, the fish they trade will be considered to be MSC certified fish as long as it is caught by a member of the client group.</p>

The point(s) at which fish and fish products may enter a chain of custody:

The scope of this certification ends at the first point of sale (at point of landing). Downstream certification of the product will require appropriate certification of storage and handling facilities at these locations. The main points of landing for this fishery are all authorised ports. A list of these can be found in the PCR.

The parties, or categories of parties, that are entitled to use this certificate to enter fish from the certified fishery into certified chains of custody:

All companies purchasing Greenland halibut from the certified fisheries are eligible to enter into MSC Chain of Custody certification if authorization is provided by the Fishery Client Associations below, based on equitable sharing of the initial and on-going cost of the fisheries certification.

The following Association Member Companies and Unattributed Fishery Client Group Companies are in good standing effective this date and are eligible to buy and sell MSC certified product from any of the six Units of Certification.

The UoAs the relevant companies are fishing in and therefore able to sell MSC eligible product are highlighted in brackets.

Atlantic Groundfish Council (All UoAs)

Company	Corporate Office Location
