

## Canada 3LN redfish

### **Stakeholder Notification of conduct of surveillance audit after certificate anniversary**

The MSC requires that, if the next surveillance is proposed to be held later than the certificate anniversary, the CAB should inform stakeholders before the anniversary date so that they are aware of the revised timing.

Accordingly, Global Trust wishes to notify stakeholders that the 4<sup>th</sup> surveillance audit of the above fishery is due to occur after the (yearly) anniversary date of the certificate (22 Nov 2022).

A surveillance announcement, including the surveillance audit dates, will be made in advance of the audit in accordance with MSC procedures.
