

Felagið Nòtaskip, Faroese Pelagic Organization

Atlanto-Scandian Herring Fishery

Marine Stewardship Council Certification

Certification Body: DNV Business Assurance

Acceptance of Faroese Pelagic Organization (FPO) corrective action plan

The corrective action plan was submitted by FPO on 26th of February 2021. DNV Business Assurance reviewed the corrective action plan and considers the proposed actions to be a significant commitment by FPO to achieve the required outcome through the main mechanisms available to them. This includes: dialog and cooperation with scientific institutions, media interaction and lobbying.

The corrective action plan is therefore accepted by DNVB and timeframe for the implementation is set until 15th December 2021 which is a certificate expiry date.

If the cause of suspension is addressed before the certificate expiry date, the certificate might be reinstated subject to successful annual surveillance. In this case, relevant information will be made available on the MSC website.
