Western and Central Pacific Solomon Islands Skipjack and Yellowfin Tuna Fishery Confirmation of Assessment Team

MRAG Americas, Inc. is currently undertaking the Marine Stewardship Council (MSC) assessment of the Western and Central Pacific Solomon Islands skipjack and yellowfin purse-seine and pole and line tuna fisheries. MRAG Americas received no stakeholder feedback during the assessment team comment period, and MRAG Americas confirms appointment of the following scientists, listed in alphabetical order, to the assessment team: Dr. Max Stocker and Dr. Robert Trumble (Assessment Team Leader). These individuals collectively have knowledge of the stock status and assessment, ecosystem impacts, and management systems applicable to this fishery.

For more information on the assessment team members, please see:
