

Gulf of California Mexican Sardine

Public Certification Report

SCS is pleased to announce the release of the Public Certification Report for the Gulf of California Sardine Fishery in Mexico.

The objection that was originally received to the certification decision was successfully settled and formally dismissed by the Independent Adjudicator on the 1st of July 2011. Agreed changes to the client action plan and final report have been incorporated into the Public Certification Report.

The consultation period is completed and this fishery can therefore be certified.

We would like to express our sincere thanks to all individuals and organizations that participated throughout this assessment process.

Dr. Sabine Daume, Program Manager
