WESTERN AUSTRALIA PEEL HARVEY ESTUARINE FISHERY

Release of the Public Certification Report

SCS is pleased to announce the release of the Public Certification Report for the Western Australia Peel Harvey Estuarine Fishery.

The Marine Stewardship Council (MSC) process for independently evaluating the fishery above has concluded and the fishery may now be certified as a source of sustainable seafood. This final determination comes after a period where stakeholders had the opportunity to object to the SCS certification board decision to certify the fishery.

No notice of objection was received during the time period required for comment on the Final Report. The final consultation period is therefore completed and this fishery is able to use the MSC's logo on its products.

We would like to express our sincere thanks to all individuals and organisations that participated throughout this assessment process and congratulate the client group on this achievement.
