

## ISF Iceland capelin

### **Ad hoc Stakeholder Notification of extension of period prior to announcement of re-assessment**

The MSC requires that the CAB shall announce the re-assessment of a certified fishery no later than 90 days after the 4<sup>th</sup> anniversary of the existing certificate. The 4<sup>th</sup> anniversary of the ISF Iceland capelin certificate is the 16<sup>th</sup> January 2022. However, in order to allow time to assess catch composition data that we have recently received and for the client to review the draft ACDR, we submitted a Variation Request (VR) to extend the period prior to announcement by 30 days to 16<sup>th</sup> February 2022. This VR was approved by the MSC.

Accordingly, Global Trust wishes to notify stakeholders that, subject to client approval to proceed, the announcement of the re-assessment of the ISF Iceland capelin will be made by the 16<sup>th</sup> February 2022.
