

Argentine anchovy (*Engraulis anchoita*), Bonaerense stock, semi-pelagic mid-water trawl net fishery

Organización Internacional Agropecuaria S.A. (OIA) would like to confirm the use of Risk Based Framework (RBF) methodology contained in the MSC Fisheries Certification Requirements v2.0 in the following performance indicators (PIs): 2.2.1, 2.3.1, 2.4.1 and 2.5.1. There were not stakeholder comments received in the consultation period.

For more information about use of RBF: https://www.msc.org/track-a-fishery/fisheries-in-the-program/certified/south-atlantic-indian-ocean/argentine_anchovy/re-assessment-downloads/20160114_RBF_ANC235.pdf

For the rest performance indicators, it will be applied the default assessment tree according MSC Fisheries Certification Requirements v2.0.

To participating in the re-certification process and submitting any comments, MSC has provided a guide and template for stakeholder to complete:

<https://www.msc.org/documents/get-certified/stakeholders/stakeholder-guide-to-the-MSC-v2.pdf/view>

<https://www.msc.org/documents/scheme-documents/forms-and-templates/template-for-stakeholder-input-into-fishery-assessments-v2.0/view>

If you would like any assistance please feel free to get in touch with us.
