**Subject: Request for variation to the MSC Certification Requirement v2.1 GCR-7.5.6 for DFA Dutch North Sea ensis**

Dear Billy Hynes,

I write with reference to your submission on 04/10/2017 of a request for variation to the MSC Certification Requirement (CR) to allow:

To extend the certificate of the fishery from the 11th November 2017 until the 15th January 2018 or the successful completion of the objection period, whichever comes first.

As you are aware, the CR procedures relating to v2.1 GCR-7.5.6 state:

The CAB shall issue fisheries certificates with a maximum validity period of 5 years from the issue date

These are integral to ensuring all MSC accredited Conformity Assessment Bodies operate in a consistent and transparent manner. The MSC intends that these requirements be met across all fisheries and CoC certificate holders, except in exceptional, well-justified circumstances, as part of the MSC programme.

**MSC notes the factors presented supporting your request, including:**

- The additional time requested ensures that the re-assessment is completed without need for further variations.
- Acoura has no concerns about the certified status of the fishery.

**Given the rationale provided, the MSC is willing to grant a variation to the CR in this case subject to the following conditions:**

- The CAB can confirm that it is not aware at this time of any factor (related to either fishery status, or performance against conditions) that could result in the fishery no longer being in compliance with the MSC Fisheries Standard.
- Stakeholders are informed.
- Ecert is updated to reflect changes, including providing a certificate covering the period from the end of the current certificate to the date accepted in the variation response.

If you have any questions regarding this response, please do not hesitate to contact the relevant Fisheries Assessment Manager for this fishery.
