## ISF Norwegian & Icelandic herring trawl and seine

### Marine Stewardship Council Certification

### Conformity Assessment Body: Acoura Marine Ltd

### Notification - Site Visit using RBF

This fishery is entering the 'information gathering' stage of the assessment against the MSC Principles and Criteria for Sustainable Fishing.

A key purpose of the site visit is to collect information and to speak to stakeholders with an interest in the fishery. For those parts of the assessment involving the MSC's Risk Based Framework (RBF) see:

<https://www.msc.org/for-business/fisheries/developing-world-and-small-scale-fisheries/our-approach-to-data-limited-fisheries>.

Please note we will be using a stakeholder-driven, qualitative analysis during the site visit. To achieve a robust outcome from this consultative approach, we rely heavily on participation of a broad range of stakeholders with a balance of knowledge of the fishery. We encourage any stakeholders with experience or knowledge of the fishery to participate in these meetings. There is now a consultation period which will complete in 30 days from the date of this announcement (dd/mm/yyyy) for stakeholder to comment on the PIs and rationale proposed on the following page.

The following performance indicators may be scored using the RBF: (delete as required)

- 2.2.1 Secondary species outcome

The fishery assessment team will be making visits to the client in Reykjavik, Iceland during week commencing 8<sup>th</sup> October 2018. If you would like to talk to the assessors, **please advise us of your interest at your earliest convenience before the site visit**, giving the following details:

- your name and contact details;
- your association with the fishery;
- the issues you would like to discuss (for us to arrange appropriate representation).

Enquiries should be sent in the first instance to:

**Acoura Fisheries Department**
