

Change to use of Risk Based Framework (RBF) on the Pan Pacific yellowfin, bigeye and albacore longline fishery

ME Certification Ltd (MEC) would like to inform stakeholders that the RBF will not be used on the above fishery for the following performance indicators: PI 2.1.1 (Primary species outcome) and PI 2.2.1 (Secondary species outcome).

At the announcement of the fishery, it was envisaged that the RBF would be used to score this PI as it was thought that there would be insufficient information on stock status reference points. However, the assessment team believes that this is no longer the case and it is therefore anticipated that the Default Assessment Tree will be used to score primary and secondary species outcomes.

Further information on this fishery can be seen on the MSC's website here: <https://fisheries.msc.org/en/fisheries/pan-pacific-yellowfin-bigeye-and-albacore-longline-fishery/@@assessments>

MEC is happy to receive comments from stakeholders on this change or on the assessment of this fishery. All interested stakeholders are encouraged to contact Kat Collinson (kat.collinson@me-cert.com) or Charlotte Gwyther (charlotte.gwyther@me-cert.com) at MEC by email, telephone or post at the below number and address:
