MARINE STEWARDSHIP COUNCIL CERTIFICATION

LAKE PEIPUS PERCH AND PIKE-PERCH

PUBLIC CERTIFICATION REPORT

Marine certification LLC announces that no notice of objection during the 15 working day time period following posting of the Final Report and Determination was accepted.

The Marine certification LLC Certification Committee has determined that Lake Peipus perch and pike-perch fishery may be certified as well managed and sustainable against the MSC Fishery Standard.

Therefore, Lake Peipus perch and pike-perch fishery is now certified for 5 years, subject to successful completion of annual surveillance audits. The Public Certification Report for this fishery is available on the MSC website at

<https://fisheries.msc.org/en/fisheries/lake-peipus-perch-and-pike-perch/@@assessments>

The parties eligible to use the fishery certificate are listed in the Public Certification Report and include AS Logi-F and nominated fishing companies. Other fishers will be able to access the fishery certificate if they meet the certificate sharing requirements determined by AS Logi-F. Change of ownership of the product occurs at the fishing company storage facilities. To ensure there is no risk of mixing, CoC must commence at the point of first landing. Eligible points of landing are confirmed as Estonian ports on Lake Peipus.

Marine certification LLC would like to express our thanks to all stakeholders who participated during this assessment.
