Australia Blue Grenadier Fishery

ANNOUNCEMENT of FISHERY RECERTIFICATION & PUBLIC CERTIFICATION REPORT

The Marine Stewardship Council (MSC) process for independently evaluating the fishery above has concluded and the fishery is now re-certified as a source of sustainable seafood.

This certification decision comes after a period where stakeholders had the opportunity to object to the assessment team's positive final determination. No objections were received, and the bio.inspecta certification committee has approved the determination and decided that the fishery is recertified.

The certificate is valid for a period of 5 years with annual surveillance audits to ensure continued compliance with the MSC standard. bio.inspecta would like to congratulate the client group on this achievement.

The Public Certification Report can be downloaded at the following link:
